ACE UL WINTER FABRIC INNER

This is the Winter Inner option in our new single person Ace tent, available Spring 2011. It combines incredible space, sit-up headroom and excellent stability all in a package with a minimum pitch weight just over 1.95kg. Our novel 'dihedral hub' has been the design breakthrough that has brought about this unique performance combination. Internal volume and sit-up height are achieved within a compact envelope. When extreme wind or snowfall threaten an internal brace is attached giving the framework rock-solid stability and increased resistance against snow accumulation.

SPECIFICATIONS

- » Single-framework, double-skin, inner-pitch-first, very-light solo tent
- » Can accommodate two at a pinch
- » 4-season + snow performance
- » Inner clips up to the framework.
- » Outer tent with twin vents attaches over and requires two pegs.
- » Min Pitch Wt: 1.98kg
- » Package Wt: 2.25kg
- » Packed Size: 35cm (folded frame length) x 14cm diameter.
- » Floor Dimensions: 220cm long x 80cm wide, Area: 1.76m²
- » Outer Canopy Fabric: 30d ripstop polyester, silicone elastomer face, tape-sealed 1500mm HH polyether (PE) back coating
- » Outer Tent Colour: Red Ochre
- » Inner Canopy Fabric: 40d air-permeable nylon, grey
- » Door Screen: 20d black nylon no-see-um mesh
- » Floor: Suspended tub, 70d nylon, light grey 5,000mm HH PE coating
- » Framework: 7001 alloy, 8.5mm OD gold anodised tube sections. Integral on shockcord and two hubs. Press-fit insert tube connectors. Framework easily disassembled for field maintenance
- » Pegs: 6 provided, 4-flute HT aluminium with pull cords
