## ALPINE EXPRESS

The multi-sport alpinist sac. This technical, mid-volume, alpine pack is perfect for day and overnight sorties into the hills. Specialist features include racking for ice tools, skis or a snowboard. A side zip provides quick access to the bag for simplified clothing layer and gear management. A total of nine straps perform a bag compression function resulting in a dramatic reduction in volume for day ascents. In addition to the detachable top cover and roll-down throat, the Synchro-FORM hip harness can be easily stripped of its pads and stowed clear of your climbing harness.

## SPECIFICATIONS

- » Single-compartment, mid-volume, high-tenacity polyester bag.
- » The long, roll-down throat allows the pack to double as a 2/3 bivi bag.
- » Complete alpine racking.
- » Detachable top cover.
