

# Wilderness Equipment

## FREYCINET

Dual compartment convenience and versatility. Smaller sister to the Karijini model, the Freycinet is a popular choice, perfect for multi-day walks in warmer climates and anytime huge bag capacity is not required. Our cross internal frame and sophisticated harness system achieve superb, dynamic comfort but don't overlook another great advantage of this unique back system: excellent free-air circulation and cooling ventilation everywhere but the harness contact surfaces. The mid-range capacity, narrower width at shoulder level and direct access to the lower part of the pack bag make the Freycinet a favourite choice for women wanting a serious back-country pack.
