i-EXPLORE 2 HYBRID MESH INNER

This new two-person i-Explore model meets the needs of outdoor education programmes where tent groups are by pairs. It is also an ideal general backpacking, camping and touring tent for a couple. Besides the narrower width floor and lower overall height it is identical to our very popular i-Explore 3 model. It features double-sided access, two useful sized vestibules, a hybrid mesh inner with excellent multi-season ventilation and easy set-up. The three poles are identical and all zips are heavy-duty. The mesh-walled inner is ideal for use alone on tropical dry-season trips. Our choice of superior fabric coatings and the incorporation of original WE detailed design features minimise maintenance costs and maximise possible service life.
