

Wilderness Equipment

i-EXPLORE 2 WINTER FABRIC INNER

For wetter and colder climates we offer this winter version of the i-Explore 2. Identical in all but size to the i-Explore 3 Winter model this tent has an all-fabric inner tent, designed to handle cold conditions and to exclude spindrift snow or dust. Mesh panels in the upper part of the two doors have simple zip-down fabric covers. In common with all our institutional tent models all zips are heavy-duty and original WE easy maintenance features come standard. This is an excellent trekking and general purpose tent for cold and wet climates. It is easy to set-up, has twin access and vestibules, cross-ventilation and space for two adults.
