

i-OVERHANG TARPS

These large, economical tarps are perfect for outdoor ed institutions and adventure travel outfitters looking for simple, reliable, field shelter for groups. i-Overhangs are designed and built to the same standard as all our other models but for i-Overhangs you supply your own guy cords, tailoring them to your use and budget. The fourteen guy attachment points follow our original tear-drop shape design providing optimum strength, far better than common triangular reinforcement patches. The guy attachments are single-layer Hypalon fabric (no cord pockets) and they are fitted with Acetal rings to dissipate the stress at the guy cord loop. The new XL size, a huge 4.5m square, also comes with doubled shock cord loops on all guy points and will be available in Spring 2011.

SPECIFICATIONS

- » 75d ripstop polyester, DWR face treatment and 3000mm HH PE back-coat.
