

Wilderness Equipment

TECTITE 1 UL

The not-so-small, ultra-light solo tent. The Tectite 1 is the smallest tent in our range of truly innovative, single-skin hybrids. With excellent space, protection, wind stability and flow-through ventilation, the Tectite 1 is an ideal tent for solo backpackers and travellers who need lightweight comfort but not blizzard protection. The strong single pole, elevated floor pan, full perimeter mesh band, fully seam-sealed canopy and big upper vents deliver essential performance. A detachable ceiling panel, acting exactly as an inner tent roof, intercepts the condensation drips inevitable in any tent on those still, damp nights. Fast and light fanatics take note: two can fit at a pinch, yielding a per capita minimum-pitch weight just over 600 grams.

SPECIFICATIONS

- » Single-pole, hybrid-single-skin, ultra-light solo tent
- » Can accommodate two if necessary
- » 3-plus-season performance
- » Detachable ceiling panel acts as an effective barrier when conditions mean condensation is unavoidable
- » Min Pitch Wt: 1.23kg
- » Package WT: 1.62kg
- » Packed Size: 45cm (pole section length) x 14cm diameter.
- » Floor Dimensions: 205cm long x 118cm wide, Area: 2.0m²
- » Canopy Fabric: 30d ripstop polyester, silicone elastomer face, tape-sealed 1500mm HH polyether (PE) back coating
- » Canopy Colour: Red Ochre
