

Wilderness Equipment

WILDCHILD

A child carrier with no limitations. The WildChild is the one child carrier to deal with the realities of taking kids on multi-day bushwalks. Of course, it also works brilliantly around town. In a car boot or baggage system, the WildChild's compact, streamlined design and folding internal frame makes for simple handling and stowage. The Synchro-FORM harness system provides superb, expedition-standard comfort. Our strong, dual back-length positions make it possible to correctly fit different height users. There is no set upper age limit for your young passenger. This pack will bear the weight as long as you also can. Accessories include sun hood and rain cover options. For multi-day trips the big volume side pockets are as indispensable as they are unique.
